YOUR RESPONSIBILITIES

- Responsibility for new and further development of frontends in the environment of process digitalization in the automotive industry.
- Development of high-performance web applications in close cooperation with our backend developers.
- Specification and design of web-based, visually appealing and easy-to-use apps in coordination with team members.
- Continuous quality improvement and monitoring of performance and maintainability together with the colleagues.
- Keep up to date with trends and new technologies and regularly exchange ideas with your colleagues.

YOUR PROFILE

- University degree in computer science, engineering or natural sciences.
- Advanced knowledge of TypeScript, JavaScript, CSS and HTML5.
- Experience with Web framework; Angular is a plus.
- First experience with UX/UI.
- Experience with object-oriented programming.
- Quality awareness, independent work and problem-solving skills.
- Understanding of IT architectures including backend and databases.
- Good communication skills (also in English, German is a plus)
- Interest in the automotive industry is an advantage.
